# Managing Creative Cloud App Versions

Make sure you use the right version of software for your class

Avoid file compatibility issues when you use lab computers to work on your assignments. Make sure you maintain the right version of Creative Cloud apps on your computer.

## What version should I use?

If you want to be able to edit the work you create in Creative Cloud apps both in the lab and on your own machine, it's important to use the *same version* of the software.

### How to Check the Application Version

Use the process below to check the version in the lab or on your own computer.

The example below is for Photoshop, but all Adobe applications work the same way.

- 1. Launch Photoshop (e.g.)
- 2. On Mac, choose Photoshop CC> About Photoshop

On Windows, choose Help> About Photoshop CC > About Photoshop

Ś	Photoshop CC	File	Edit
